How It Works - The Zyatrim Success Secret!

“You are born with a certain number of fat cells. When you diet and lose weight your fat cells shrink in size. When you gain the weight back - the fat cells swell and increase in size. The number of fat cells never changes - just their size does. Liposuction is so popular because it removes fat cells from your body never to return - but now Zyatrim actually kills fat cells without surgery - never to return!”
